## LOGO VERSIONS

The logo for providers is available in both mono and reversed versions. These versions are supplied as EPS files. The logo should not be manipulated or rotated in any way.

## MINIMUM SIZE AND CLEAR SPACE

The logo should not be reduced any further than 30mm wide. This size is used when there is limited space. Where possible a larger size of the logo should be used. A clear space of at least 5mm should be observed around the logo and where possible additional space should be allocated.

## CO-BRANDING

Providers should use their own Visual Identity for materials that they produce. The NCRIS logo should be placed in a secondary position to any provider logos and must be proportional to the size of any adjacent logos.

## EXAMPLE PLACEMENT

The logo should be present on all provider materials. On websites, the logo should appear on the home page and should be visible without having to scroll the page. Contrast and legibility should not be compromised.
